SKILLS

- IaC(AWS CDK)
- Serverless systems
- JS & Nodejs
- React & Next & Vue
- HTML & CSS

I'm work-oriented and before deciding on my career path I taste every aspect of engineering.

SOFTWARE ENGINEER

Uppercasebrands

2021 - Present

- Created a brand new SaaS application for Shopify platform and two microservices for existing SaaS application. For these projects, my responsibilities extended from designing the underlying system architecture to implementing CI/CD and OAuth flows.
- Contributed to multiple e-commerce website creations.

ACADEMIC ACHIEVEMENT

27,870th place in National University Entrance Exam among ~2 million Participants (2015)

GOLD SMITH

Mega gold

2011 - 2015

SIDE PROJECTS

INSENTENCE.NET

The project was an attempt to improve my English proficiency while coding aside.

- It uses AWS services for computing and distribution but it leverages the best-in-class AI tool in Azure to convert text to speech.
- Thresholds of this project were serving dynamic pages without using compute source and using real-time data for https://insentence.net/sitemap.xml.
